PROFESSIONAL SUMMARY

Disciplined and results-driven Software Engineer with a **Bachelor of Computer Applications (BCA)** and proven expertise in building responsive, scalable full-stack web applications and robust software solutions. Proficient in modern JavaScript (React.js), Python scripting, PHP, and SQL database architecture. Adept at translating user needs into clean, maintainable code with strong analytical problem-solving and cross-functional agile collaboration.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), Python, C++, Java, PHP, SQL, HTML5, CSS3
Frontend & UI:	React.js, Tailwind CSS, Modern CSS3, Responsive Design, State Management, DOM APIs
Backend & Database:	PHP, Python Scripts, MySQL, Relational Database Design, CRUD Operations, RESTful APIs
Tools & Methodologies:	Git & GitHub, VS Code, OOPs, Data Structures & Algorithms (DSA), System Architecture, Agile

PROFESSIONAL EXPERIENCE

Web Developer — Professional Web Development & Software Services — Recent Experience

Deoria, Uttar Pradesh, India

- Architected and maintained high-performance web applications utilizing **HTML5, CSS3, JavaScript, PHP**, and **MySQL**.
- Implemented structured relational database schemas, dynamic querying, and API endpoints for real-time data persistence.
- Partnered with cross-functional project teams to translate client requirements into pixel-perfect, accessible user interfaces.
- Applied standard software engineering methodologies, modular component design, and Git version control for clean codebases.

KEY PROJECTS

MedPulse – Healthcare & Diagnostic Management System — React, PHP, SQL, CSS3

- Built an end-to-end healthcare portal featuring real-time doctor appointment scheduling and patient diagnostic records.
- Integrated secure SQL database queries ensuring high data integrity, quick search indexing, and automated report logs.

CloudVault – Inventory & SQL Analytics Dashboard — Python, SQL, Analytics

- Engineered an automated inventory tracking dashboard handling transactional data flows, stock alerts, and visual analytics.
- Optimized complex SQL queries for fast aggregation of inventory metrics and historical reporting.

ApexCommerce – Full-Featured Modern E-Commerce Platform — React.js, PHP, MySQL, CSS

- Engineered an e-commerce platform with faceted category filters, persistent cart state, and order summary computation.

AlgoVisualizer – Interactive DSA & Algorithms Platform — C++, JavaScript, React

- Created an educational visualization tool for sorting algorithms (QuickSort, MergeSort) and graph traversals with complexity metrics.

EDUCATION

Bachelor of Computer Applications (BCA) — Graduate

University / Institute of Computer Applications • Uttar Pradesh, India

Coursework: Web Development, Database Management Systems (DBMS), OOPs (C++, Java, Python), Software Engineering, Data Structures & Algorithms.

LANGUAGES & PERSONAL

Hindi: Native / Proficient

English: Professional Working Proficiency

Location: Ram Gulam Tola, Deoria, UP - 274001
